Lake Manyara  
National Park

- 1981: Year the serengeti National Park was designated by Unesco as World Heretige Site
- 2500: Number of Kilometers traveled by a wildebeest during the migration
- 270: Maximum weight in kilograms of adult wildebeest
- 500,000: Number of Thompson's gazelle who travel during the great migration, alongside 1.5 million wildebeest, 200,000 zebra, and 18,000 eland (a type of antelope)
- 250,000: Number of wildebeest who die during the migration, either from thirst or hunger, or predation.
- 50%: Amount of its bodyweight a crocodile can thrust out of the water in order to latch onto prey — such as migrating animals — as it drinks from the water's edge.
- 8,000: Estimated number of wildebeest born each day during the month of February.
